## Evolution Facility List

(32,000 sq ft factory based on 1.5 acre plot)

# Company History

Evolution started trading in June 2000. However its roots can be traced back to 1987 when a company called Speedgraphics was started. Speedgraphics was a traditional Reprographics business based on the principles of harnessing the latest kit, combined with a highly motivated workforce to deliver the highest quality at a competitive price. This combined with exceptional Customer Service proved to be a winning formula. It was these principles that the Directors took forward to Evolution, and established a printing company which has a clear focus and consistent delivery capability.

Evolution recognised the changes in the printing world and was able to move quickly to keep ahead of the continual changes in technology. It now deals with a cross section of customers from many areas of the economy.

## Pre-Press and Digital Proofing

- **Trueflow 3** PDF-based workflow
- Screen PTR 8000 B1 CTP plate device - fully automated
